

Our school uses the teaching techniques that combine the classical approach and the communicative methods. **Japanese is taught** through the communicative methods. The teaching is conducted by the lecturers to whom Japanese is not only their job, but a style of life.

The basic course comprises 2 years of study, approximately 150 academic hours. The completion of the 2 year course prepares you to take the [Japanese Language Proficiency Test](#)

of the 4<sup>th</sup>

level of language competence. The first year of study corresponds to the level of A1 of European language competence, the second year accordingly to the level of A2.

At the end of each semester we offer you to take a transitional **test** to estimate your results in language learning.

The effectiveness of the course is guaranteed by active using the **audio/videomaterials**. We also provide our students with all the study materials.

From time to time the lessons are given by **native speakers** which promotes your languages skills and introduces to you the culture of the studied language.

To register, please visit the [link](#) or fill in [a registration form](#) and send it to
